

Wall Magazine Publication Report

Name: *Cross-coupling*

Theme: Nobel Prize in Chemistry

Date of Publication: 01/03/2024

No. of Participants: 15 students

Purpose: Publishing a wall magazine serves several valuable purposes.

Apart from academic skill students can express their creativity through a platform like wall magazine. Through articles, poems, drawings, and compositions, they can share their ideas, insights, and artistic talents within the scientific community. As well as students also interact with their seniors or juniors and engaged themselves with creative work. Wall magazine serves as an extraordinary window for learning beyond the curriculum and encouraging students to explore different topics related to chemistry. In this year department can use wall magazine theme to raise awareness regarding application of Nobel work in chemistry.

Department of Chemistry arranged this program on 1st March, 2024. Department has tried its best to make the day remembered and on this special day 1st Semester students have presented slides on the topic application of Nobel Prize topic in Chemistry. Respected professors from several department of our college joined us to motivate our student. Dr. Puspita Mahata chaired all the programme.
